

RUBRIC: Virtual Machine Setup (Ubuntu Desktop)

Activity: Create, Configure, and Install Ubuntu Desktop on a Virtual Machine

Total Points: 100

Criteria	Excellent (100%)	Proficient (75%)	Developing (50%)	Incomplete (0%)	Score
VM Type & Version (10 pts)	Correctly selects Ubuntu (64bit) as the OS type and version. Matches the downloaded ISO architecture.	Selects correct type but wrong version (e.g., 32bit instead of 64bit) — VM still works.	Selects wrong OS type entirely (e.g., "Other Linux") — needs correction.	Fails to select any valid OS type; cannot proceed.	/10
Memory (RAM) Allocation (15 pts)	Allocates 4-8GB RAM as required. Understands the host system limitation.	Allocates 3GB – 3.5GB (sufficient but slightly below requirement).	Allocates 2GB or less — causes severe lag or installation failure.	Allocates no RAM or invalid value.	/15
Processor (CPU) Allocation (15 pts)	Allocates 4 CPU cores with 100% execution cap . Enables PAE/NX if available.	Allocates 2 cores but does not adjust execution cap or nested VTx settings.	Allocates only 1 core — installation takes extremely long.	Fails to configure processor settings.	/15
Hard Drive (Storage) Setup (20 pts)	Allocates 100 GB dynamically allocated storage (or fixed). Created a partitioning in drive.	Allocates 25GB but chooses wrong disk format (e.g., VHD) — still functional.	Allocates less than 20GB — insufficient for installation.	No hard drive created; VM cannot boot.	/20

ISO Attachment & Boot Order (15 pts)	Correctly attaches the Ubuntu Desktop ISO to the optical drive. Sets boot	Attaches ISO but forgets to adjust boot order — manually boots	Attaches ISO but boot order wrong — VM boots to blank screen.	Fails to attach ISO; VM cannot install.	/15
	order: Optical → Hard Disk.	via "Force BIOS" first time.			
Proper Installation Execution (25 pts)	Completes full installation: partitioning ("Erase disk"), user setup, timezone, keyboard. No errors. Reboots successfully into GUI.	Completes installation but makes minor errors (e.g., wrong timezone — fixes later).	Installation starts but fails midway (partitioning error, corrupt ISO, or power loss).	Installation not attempted or aborted.	/25

TOTAL SCORE: ____ / 100 DOCUMENTATION REQUIREMENT

Student Name: Akhylle Rei Resurrection Toledo

Date: August 27, 2026

VM Name: Oracle Linux OS

1. VM Specifications Summary

Component	Allocated Value
VM Type / OS	Ubuntu (64-bit)
RAM	<u>6</u> GB (<u>6000</u> MB)
CPU Cores	<u>4</u>
Hard Drive Size	<u>100</u> GB (Dynamic / Fixed)
Storage Controller	SATA / SCSI

Network Adapter

NAT / Bridged

ISO File Used

ubuntu-26.04-desktop-amd64

2. Step-by-Step Setup Process

(Describe what you did, in order. Include commands used, if any.)

1. Virtual Machine and Operation System Creation using Virtual VM VirtualBox Manager
2. Ubuntu Preparation
3. Partition Creation
4. Ubuntu Account Creation
5. Ubuntu Installaton

3. Issues Encountered & Resolutions

(List any problems during setup and how you fixed them.)

Issue: None	Solution: I'm him
-------------	-------------------

4. Verification Screenshots

(Paste screenshots here or attach separately)

- VM Settings (Memory, CPU, Storage)

- ISO Attached / Boot Order

- Installation Progress

Ready to install

Review your choices

General

Type of installation: Manual installation
Installation disk: VBOX HARDISK sda
Applications: Default selection

Security & more

Disk encryption: LUKS (LVM)
Proprietary software: None

Partitions

sda2
Ubuntu 26.04 sda1 Created and formatted as ext4 used for /
sda3 Created and formatted as ext4 used for /boot

Back

Install

Ubuntu 26.04

Fast, free and full of new features

The latest version makes computing easier than ever.
Whether you're a developer, creator, gamer or administrator you'll find new tools to improve your productivity and enhance your experience in this release.
